#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 26 April 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. This is a national stage application of PCT/US03/24272. Claims 1-32, 43, 44 and 46 are pending in the instant application. Claims 33-42 and 45 were cancelled by preliminary amendment filed on April 26, 2006.

### *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 1-23, 43, 44 and 46 drawn to products of Formula Ib wherein Q<sup>2</sup> does not form a ring and R<sup>1</sup> does not represent a ring other than phenyl or tetrazolyl. Further election of a single compound is required.
- II. Group II, claim(s) 1-8, 11 and 15-23 drawn to products of Formula I not covered by Group I, wherein Q<sup>2</sup> does not form a ring and R<sup>1</sup> does not represent a ring other than phenyl or tetrazolyl. Further election of a single compound is required.
- III. Group III, claim(s) 1-23, 30-32, 43, 44 and 46 drawn to products of Formula I not covered by Groups I or II. Further election of a single compound is required. Further restriction may apply.
- IV. Group IV, claim(s) 30-32 drawn to the process of making products of Group I. Further election of a single compound is required.
- V. Group V, claim(s) 30-32 drawn to the process of making products of Group II. Further election of a single compound is required.
- VI. Group VI, claim(s) 30-32 drawn to the process of making products of Group III. Further election of a single compound is required. Further restriction may apply.
- VII. Group VII, claim(s) 24-29 drawn to the process of using products of Group I. Further election of a single compound is required.

Art Unit: 1626

VIII. Group VIII, claim(s) 24-29 drawn to the process of using products of Group II. Further election of a single compound is required.

IX. Group IX, claim(s) 24-29 drawn to the process of using products of Group III. Further election of a single compound is required. Further restriction may apply.

3. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

The technical feature linking the subject matter of Groups I-IX is the core structure below.

Compounds of this structure are taught in the prior art (eg Lincoln et al., CAPLUS AN 1986:198778, priority date 1986).

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: compounds encompassed by the generic definition of Formula I, obtained by varying the core substituents (see for example compounds of claim 19).

Art Unit: 1626

Applicant is required, in reply to this action, to elect a single species within the elected group to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner: claims 1-18, 20-32, 43, 44 and 46 are generic.

6. The species described within section 4 do not relate to a single general inventive concepts under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the reason above (see section 3).

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species and invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention and species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly

and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sun Jae Y. Loewe whose telephone number is (571) 272-9074. The examiner can normally be reached on M-F 7:30-5:00 Est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on (571)272-0699. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
